

Thank you for choosing a Weatherables! We are proud to provide the highest quality vinyl fencing and railing available and are fully committed to providing you with superior service from the very first time we work together to long after we've delivered your product. This guide is designed to walk you through the installation process. If you have any questions, please give us a call at 1-888-743-3673 and welcome to Weatherables.

Step 1 Measure the height of the post to be wrapped. Subtract 1/8" from that measurement to adjust for expansion. Cut all 4 pieces of the post wrap to that length.

Step 2 Connect two of the parts of the wrap by compressing them together around the post. Keep compressing until the two parts fit snugly on the post. Remove the assembled parts and set them aside.

Step 3 Repeat step 2 with the remaining two pieces of the post wrap. One these pieces are connected, clamp them in place on the post.

Step 4 Slide the pieces assembled in step 2 onto the post. Align the ribs and channels with the pieces clamped to the post in step 3.

Step 5 Compress the two halves together until the entire wrap fits snug to the post.
